(54) Title: PROCESS AND COMPOSITION FOR CONTROLLING FECAL HAIR EXCRETION AND TRICHOBEZOAR FORMATION

(57) Abstract: A process and composition for controlling fecal hair excretion and trichobezoar formation in animals such as cats and rabbits is provided and includes feeding the animal a composition comprising from about 10 to about 42 wt% crude protein, from about 4 to about 30 wt% fat, from about 1 to about 25 wt% total dietary fiber, and a supplemental fiber source. The supplemental fiber source is present in amounts which provide from about 1 to about 13 weight percent of supplemental total dietary fiber. The animal is maintained on the diet for a sufficient period of time to control fecal hair excretion and trichobezoar formation.
