

ABSTRACT

The present disclosure relates to an audio sharing method and apparatus, a device, and a medium. The audio sharing method comprises: displaying a target object in a target interaction interface, the target object comprising an original video using a target audio to be shared as a background music and/or a sharing control of the target audio, and the target audio being a published audio; when a first trigger operation on the target object is detected, displaying a preset playing interface, the preset playing interface displaying a target video using the target audio as background music, the target video being used for sharing the target audio, and the target video comprising a visual material generated according to the target audio. By means of the embodiments of the present disclosure, personalized requirements of a user can be met, and the threshold of video production can be reduced.
