

AUTOMATIC INJECTION DEVICES HAVING OVERMOLDED GRIPPING SURFACES

Abstract

5 Exemplary embodiments provide automatic injection devices, housing components for
automatic injection devices and methods for fabricating the same. An exemplary housing of an
automatic injection device may be overmolded with one or more gripping surfaces to facilitate
gripping and manipulation of the automatic injection device by a user when performing an
injection. In an exemplary embodiment, an overmolded left gripping surface may extend along a
10 left side of the housing and an overmolded right gripping surface may extend along a right side
of the housing opposite to the left side.
