

ABSTRACT

METHOD AND APPARATUS FOR HANDLING PROTOCOL DATA UNIT SESSION, AND ELECTRONIC DEVICE

Embodiments of this disclosure provide a method and an apparatus for handling a protocol data unit session, and an electronic device. The method includes: transmitting a protocol data unit PDU session release request to a network device in a case that at least one of an authorized quality of service QoS rule, packet filter, and/or authorized QoS flow description configured by a network device for the PDU session exceeds a maximum support capability set by user equipment for the PDU session.
