

ABSTRACT

Provided herein is a medicinal agent for the prevention and/or treatment of diseases caused by EP₄ receptor activation.

5 A compound having antagonistic activity against the EP₄ receptor is contained as an active ingredient in the medicinal agent. The compound represented by the following general formula (I), a salt, an N-oxide, or a solvate thereof, or a prodrug of these is useful as a medicinal component having
10 antagonistic activity against the EP₄ receptor for the prevention and/or treatment of diseases caused by EP₄ receptor activation.

In the formula, all symbols are as defined in the
15 specification.
