(54) Title: DISINFECTION OF A CONTAMINATED ENVIRONMENT		
(57) Abstract The present invention provides methods and compositions for inhibiting microbial growth through the use of flavonoid aldehydes or alcohols for the purpose of disinfecting contaminated environments. The methods include the step of contacting the unsterile area with an amount of a flavonoid aldehyde or alcohol sufficient to control growth of pathogenic microbes. The aldehyde or alcohol can be provided in a variety of formulations. This Sheet Has Been Replaced
