(54) Title: TRANSMITTING EXTENDED INFORMATION TO USER EQUIPMENT (UE) IN A STANDALONE NON-PUBLIC NETWORK (SNPN)

FIG. 2

(57) Abstract: Various aspects of the present disclosure relate to providing a network with information about the capabilities of UEs, so the network can send extended information (e.g., extended SOR-SNPN-SI) to UEs that can handle and properly utilize such information. For example, a UE can provide its 5GMM capability information to the network during a registration procedure, and in response, the network can provide lists of SNPNs/GINs, which can include the extended information (e.g., via various container IE configurations).
