

ABSTRACT

BINDER BASED ON ALUMINA-RICH SLAG

One subject of the invention is a hydraulic binder for a mortar composition comprising at least one ground granulated high-alumina slag comprising less than 30% by weight of silica. Other subjects of the invention are:

- a dry mortar composition comprising at least one such binder and aggregates and/or fillers
- floor products such as coatings or screeds, or technical mortars, capable of being obtained by mixing such a dry mortar composition with water.
