(54) Title: CHIP PUSHER WITH CHIP DETECTION FOR LOCAL AND REMOTE GAMEPLAY

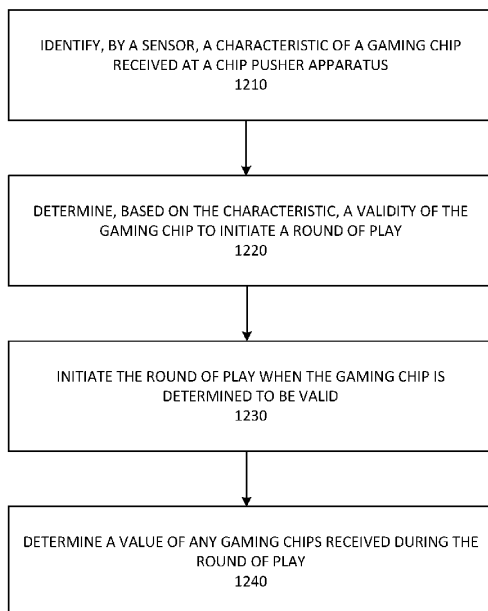

FIG. 12

(57) Abstract: The present disclosure relates to systems and methods for gaming related to chip pusher apparatuses. Various embodiments may include identifying, by a sensor, a characteristic of a gaming chip received at a chip pusher apparatus, determining whether the gaming chip is valid to initiate a round of play, initiating a round of play, determining a value of any gaming chips received during the round of play, and updating a player account. Additional embodiments may enable remote operation and gameplay. In an example, systems and methods may include receiving information indicative of a remote wager for a round of play, initiating the round of play, resolving the wager, and updating a player account associated with the wager.
