Chat
Matthew: safeboot
Trevor: I heard Sanctuary is not "go-forward" for our Vista PCs
Matthew: Talked to Corey Hampton and he mentioned that we might go to this at some point to replace safeboot
Carla: hmmm. This seems to act the same way well, sort of at least for the files on the computer
Carla: Is this what the safeboot does for us?
Trevor: yes
steve (presenters): Mike can you recommend a good book I may purchase concerning managing Vista enviroment?
Brenda: Doug states (as Ryan did) that we would have admin permission with our Admin accts by enabling the UAC prompt for credentials command (C:\Windows\LMUtil\LM Enable UAC Consent_A_Account.com) He also said that developers and other users who are admins on their machines, the prompt-for-consent, is going to be required for any action that requires elevation, BUT raised as an issue and is now being reviewed. No decision has been made yet on whether the prompt-for-consent
