(54) **Title:** GUI-FACILITATED CENTRALIZING METHODS AND SYSTEMS

FIG. 6

(57) **Abstract:** Graphical User Interface (GUI) facilitated centralization methods and system, including a method that includes displaying a graphical representation of a tubular string within a borehole, accepting an interactive graphical selection of a starting location for a range along the borehole, and accepting an interactive graphical selection of an ending location for the range along the borehole. The method further includes determining string stand-off device positions that provide centralization within the range, and providing said positions to field personnel assembling and placing the tubular string in the borehole.
