A HAND HELD SUPPORT ASSEMBLY

ABSTRACT

5

A hand held support assembly for a device or an appliance (7) is disclosed. In addition, an assembly that includes a device or an appliance and a handheld support assembly supporting the device/appliance for movement relative to the support assembly is disclosed. The support assembly includes: a handle (3) that a user can grasp with a hand and an arm (5) that extends from the handle. The support assembly also includes a pivot connection (11) for supporting the device/appliance on the arm so that the device/appliance can move within a range of angles relative to the arm. The support assembly also includes a means for adjusting the angular relationship of the device/appliance and the arm. The adjustment means is adapted to be actuated by the user by means of the hand that is grasping the handle. The adjustment means includes a trigger-type lever (9) and a series of mechanical interconnections between the lever and the device/appliance.
