

ABSTRACT

A positioning measurement information reporting method and an apparatus are provided, and are applied to the field of wireless communication technologies. The method includes: A first terminal device determines first positioning measurement information and first information, and
5 sends the first positioning measurement information and the first information. The first information indicates an association between at least one antenna reference point and at least one sidelink positioning reference signal sent via the at least one antenna reference point, and the at least one antenna reference point is an antenna reference point on the first terminal device.
