

Abstract

Method for Paging, Access Network Device, and Terminal Device

5 Disclosed in embodiments of the present application are a method for paging, an access
network device, and a terminal device. The method comprises: an access network device
receives mobile information of a terminal device from the terminal device; the access network
device determines, according to the mobile information, a target paging area in which the
access network device initiates paging to the terminal device; the access network device sends
10 the target paging area to the terminal device. The method, the access network device, and the
terminal device of the embodiments of the present application help an access network device
configure a suitable paging area, thereby reducing signaling overhead.
