(54) **Title:** SYSTEM AND METHOD FOR STAFFING TEMPORARY MEDICAL POSITIONS

(57) **Abstract:** A system and method for staffing temporary medical positions offered by medical service providers to medical professionals. Communications between the medical service providers and medical professionals may be via a temporary medical position staffing system, thereby increasing the rate and times at which the medical service providers and medical professionals can be performed. A medical service provider may order a temporary medical position to be filled and the system may generate communications with the medical professionals over a variety of different electronic mediums to notify the medical professionals about the temporary medical position. The system may provide for the medical professionals to negotiate with the medical service providers by negotiating negotiable terms, such as pay rate.
