Method and Apparatus for Issuing Electronic Books

Abstract

A method and an apparatus for issuing electronic books, the method comprising: receiving a request sent by a user by means of scanning an obscured secret code on a book, the request comprising a secret code sequence number corresponding to the secret code, the secret code sequence numbers of different books being different, and the secret code sequence number being uniquely matched to a book ID, on the basis of the secret code sequence number, looking up a book ID corresponding to said secret code sequence number, and sending to the user the electronic book corresponding to the book ID. An electronic version of a book can be issued to a user whilst ensuring copyright protection.
