

ABSTRACT OF THE DISCLOSURE (FIG. 1)

"METHOD AND APPARATUS FOR PERFORMING
SELF-SERVO WRITING IN A DISK DRIVE"

5

Disclosed herein is a self-servo writing method
that uses the head of a disk drive to write servo data
on a disk-shaped medium. This method calculates an
accurate position offset between the read-head element
10 and write-head element incorporated in the head, by
using the positioning servo data and measuring servo
data that are recorded on the disk-shaped medium.
