(54) Title: SYSTEMS AND METHODS FOR ENHANCED VISUAL PRESENTATION USING INTERACTIVE VIDEO STREAMS

(57) Abstract: In some embodiments, the invention involves a method of storing and providing frames of video streams. The method includes storing video streams of a subject from different viewpoints, wherein different ones of the video streams are in different states including different ones of the viewpoints. The method also includes responding to requests for frames of the video streams in forward, backward, and state changing directions, by providing the frames, if available. The frames may be provided to a remote computer through the Internet. In other embodiments, the invention involves a method of controlling video streams. The method includes displaying frames of the video streams, wherein the video streams are of a subject from different viewpoints and different ones of the video streams are in different states including different ones of the viewpoints. In response to activation of a user input device, displaying at least one additional frame, if available, in a forward, backward, or state changing direction with respect to a currently displayed one of the frames, depending on the activation. Other embodiments are described and claimed.
