(54) Title: SYSTEM, DEVICE, METHOD AND COMPUTER CODE PRODUCT FOR PARTIALLY SHARING DIGITAL MEDIA

(57) Abstract: A method, device, system, and computer code product provide shared applications for mobile terminals operating in a communication network. The system includes a first mobile terminal and a second mobile terminal in communication with the first mobile terminal. The method comprises configuring a first version of an application for execution on the first mobile terminal, connecting the first mobile terminal to the second mobile terminal, transferring a second version of the application to the second mobile terminal using the connection, and limiting an execution of the second version of the application. In an alternative embodiment, the method comprises initiating execution of an application at a first mobile terminal, connecting the first mobile terminal with a second mobile terminal, sending a view of the executing application from the first mobile terminal to the second mobile terminal, and receiving the view of the executing application from the first mobile terminal at the second mobile terminal.
