(54) Title: MONITORING SITES CONTAINING SWITCHABLE OPTICAL DEVICES AND CONTROLLERS

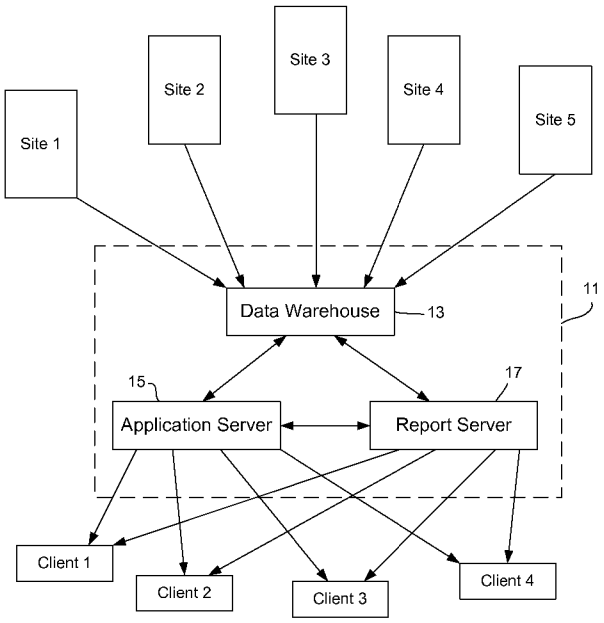

Figure 1A

(57) Abstract: A site monitoring system may analyze information from sites to determine when a device, a sensor, a controller, or other structure associated with optically switchable devices has a problem. The system may, if appropriate, act on the problem. In certain embodiments, the system learns customer/user preferences and adapts its control logic to meet the customer's goals.
