(54) Title: SYSTEM AND METHOD FOR TRANSMISSION SOURCE IDENTIFICATION

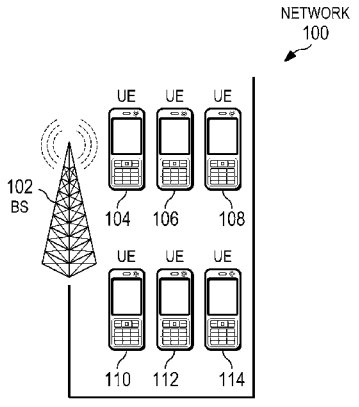

FIG. 1

(57) Abstract: A method embodiment includes receiving, by a first network device, a first transmission comprising an explicit first source identification (ID). The first source ID is added to a list of active source IDs. The first network device receives a second transmission. The second transmission does not include an explicit second source ID. The first network device determines the second source ID by using the list of active source IDs.
