Claims:

1. A flavour composition comprising:
   from 0.01% to 25% by weight of a characterizing flavour; and
   from 0.1% to 6% by weight of a taste modifying composition including from 60% to 99% by weight of at least four non-polar amino acids selected from the group consisting of glycine, alanine, valine, proline, leucine, isoleucine, methionine, proline, phenylalanine, and tryptophan, and from 1% to 40% of at least one polar amino acid selected from the group consisting of tyrosine, serine, threonine, cysteine, glutamine, asparagine, aspartic acid, glutamic acid, lysine, histidine and arginine and mixtures thereof;
   wherein the at least four non-polar amino acids are present in equal molar concentrations.

2. The composition according to claim 1, further comprising at least five non-polar amino acids.

3. The composition according to claim 1, further comprising at least six non-polar amino acids.

4. The composition according to claim 1, wherein the at least one polar amino acid is aspartic acid or glutamic acid.

5. A consumable comprising the flavour composition according to claim 1.

6. The composition according to claim 1, wherein the flavour composition is in the form of a powder.
