

A METHOD TO ANALYSE, SYNCHRONIZE, AND UPDATE OF TABLE FIGURE LISTING CONTENT IN CLINICAL TRIALS DOCUMENTS

ABSTRACT OF DISCLOSURE

A method to analyse, synchronize, and update of table figure listing (TFL) content in clinical
5 trials documents using word plugin is disclosed. The method comprises the steps of:

- (i) uploading TFL source data through the word plugin from a source file;
- (ii) reading metadata of the TFL source data from a word content control, wherein the
metadata stores various configurations of TFL;
- (iii) generating new in-text TFL from the TFL source data with the TFL metadata;
- 10 (iv) updating the new in-text TFL content to correspond to the word content control;
- (v) configuring the word content control in (iv); and
- (vi) filtering and sorting the new in-text TFL content based on the configuration of (v).
