(54) Title: ASSET MANAGEMENT METHOD AND APPARATUS, AND ELECTRONIC DEVICE

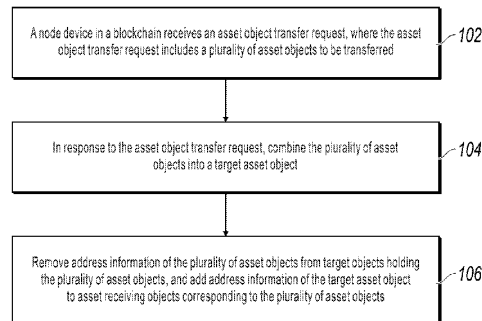

FIG. 1

(57) Abstract: One or more implementations of the present specification provide for asset management. One implementation can include receiving, by a node device in a blockchain, an asset object transfer request, where the asset object transfer request comprises a plurality of asset objects to be transferred. In response to the asset object transfer request, combining the plurality of asset objects into a target asset object. Address information of the plurality of asset objects are removed from target objects holding the plurality of asset objects, and address information of the target asset object is added to asset receiving objects corresponding to the plurality of asset objects.
