(54) Title: METHODS FOR PURIFYING A TARGET PROTEIN FROM ONE OR MORE IMPURITIES IN A SAMPLE

Figure 3

(57) Abstract: The present invention relates, at least in part, to improved methods of protein purification. In particular, the present invention relates, at least in part, to methods for purifying an Fc region containing protein from a composition comprising the Fc region containing protein and one or more impurities, where the methods eliminate the need for a holding tank and/or a buffer exchange step.
