

ABSTRACT

A method and device for playing live videos

Various embodiments of the invention disclose a method and device for playing live videos, which belongs to the technical field of internet technology. The method includes: playing a live video of a primary streamer in a first live stream window, and playing a live video of a secondary streamer in a second live stream window, wherein the secondary streamer is a streamer that performs microphone-linked live stream with the primary streamer; and adjusting the size of the second live stream window, and playing the live video of the secondary streamer in the adjusted second live stream window, when a window adjustment instruction corresponding to the second live stream window is received. The invention can enhance the viewing experience.
