

[illegible]

This cross-sectional diagram illustrates a mechanical assembly. A central horizontal component, labeled 3, is positioned between two vertical supports, labeled 2. The supports 2 are mounted on a base, labeled 6. The top of the assembly is enclosed by a cap or housing, labeled 5. The central component 3 is shown with a textured surface, possibly indicating a specific material or finish. The supports 2 have a complex, multi-faceted design. The base 6 is a solid, rectangular block. The overall assembly is symmetrical about a vertical centerline. Various reference numerals are used to identify specific parts and features: 1 points to the central cavity, 111 points to the upper part of the support, 121 points to the lower part of the support, 211 points to the base of the support, and 212 points to the side of the support.
