

SOUND ZONING SYSTEM

[ABSTRACT]

5 A sound zoning system (10) is a system that divides a space
(50) into a plurality of zones according to types of sound content
audible in the space (50). The sound zoning system (10) includes: a
plurality of loudspeaker devices (40) that belong to a first group for
creating a first zone among the plurality of zones; and a control device
(20) that transmits first playback start time information to each of
10 the plurality of loudspeaker devices (40) via wireless communication
while the plurality of loudspeaker devices (40) are playing back sound
content A. The first playback start time information indicates a
playback start time of sound content B that is to be played back
following the sound content A.
