(54) Title: IMMUNOGENIC STREPTOCOCCUS PROTEINS

Fig. 1A FACS analysis on intact *S. uberis* strain 41-241

(57) Abstract: The invention provides means and methods for identifying a *Streptococcus* protein which is capable of eliciting an immune response against at least two Streptococcus strains and/or serotypes. The invention further discloses immunogenic compositions capable of eliciting an immune response against *Streptococcus* uberis comprising at least two recombinant and/or isolated proteins derived from *Streptococcus* uberis, and/or an immunogenic part or analogue or derivative of either or both of said proteins. The invention further discloses nucleic acid molecules encoding said proteins or immunogenic parts thereof, host cells and recombinant carriers comprising such nucleic acid molecule, and vaccines and diagnostic tests based on said proteins and nucleic acids.
