(54) Title: APPARATUS, SYSTEM, AND METHOD FOR TRANSPORTING AND INSTALLING A FLEXIBLE BIOPRO-
CESSING VESSEL APPARATUS, SYSTEM, AND METHOD FOR TRANSPORTING AND INSTALLING A FLEXIBLE BIO-
PROCESSING VESSEL

(57) Abstract: An apparatus 300 for transporting and installing a flexible bioprocessing vessel includes a base portion 302 having a front end and a rear end, the base portion configured for attachment to a hexagonal bottom surface of the flexible bioprocessing vessel. The apparatus further includes a first wing portion 304 and a second wing 306 portion both hinged to the base portion and selectively movable between a first position and a second position. In the first position, the first wing portion and the second wing portion are angled relative to the base portion to form a storage cavity for the flexible bioprocessing vessel. In the second position, the first wing portion, the second wing portion, and the base portion are substantially planar. The apparatus has a hexagonal outer profile configured for attachment to the hexagonal bottom surface of the flexible bioprocessing vessel and for placement within the
