

ABSTRACT**AUTOMATIC WATER EXTINGUISHER AND ASSOCIATED FIRE PROTECTION****INSTALLATION**

5

The invention relates to an automatic water extinguisher (100) intended to be mounted on an opening (42) of a pipeline (40), said extinguisher (100) comprising: a base (24A) having a through-hole (26), and a seal (28) intended for sealing the connection between the opening (42) and the through-hole (26). The base (24A) further comprises at least two anchoring points (25A), and the extinguisher (100) comprises at least one clamping collar (30) comprising: an elongate element (31) intended to partially surround the pipeline (40), said elongate element (31) cooperating with the base (24A) at said anchoring points (25A), and means (32) for adjusting the length of the at least one clamping collar (30) so that the extinguisher (100) is able to be mounted on pipelines (40) of different diameters.
