(54) Title: A STORAGE CASE AND A HOLDER THEREOF

(57) Abstract

The present invention provides a storage case having a thin configuration, which can be produced in reduced production processes to gain a cost reduction. In the figure, the storage case (1) is made of a plastic sheet and formed by folding it in accordance with the shape and size of the material (sheet-like, such as memorandum, CD-ROM). The engagement face (2) is formed with a convex cut (6), the direction of which is toward the free end (2a) of the engagement face (2). Wherein, the storage case (1) can store the material by inserting it in the cut (6) and further inserting the free end (4a) of the cover face (4) into the cut (6).
