WO 02/064672 A1

(54) Title: POLYMERIC COMPOSITE FOAM

(57) Abstract: A polymeric composite foam is disclosed where the continuous phase is a foamed phenolic/furan polymer and the disperse phase is a foamed polystyrene polymer. The composite has a preferred density in the range 25 - 50 kg/m³ and the composites exhibit good thermal insulation and fire resistant properties. The process for preparing the composites is relatively low cost.
