G00002

(54) Title: SYSTEM AND METHOD FOR RECURSIVE PATH ANALYSIS OF DBMS PROCEDURES

162162

(57) Abstract

A system, method and database development tools are disclosed for automatically generating the complete dependency graph (12) for use in debugging stored code objects (11) in a database, by using a recursive dependency tracking algorithm (14) which takes into consideration the indirect dependencies (15) on triggers as well as the dependencies on implementations of object oriented code objects which are represented as separate objects in the database catalog.
