(54) Title: CAP FOR MALE AND FEMALE THREADED FITTINGS

FIG. 1

(57) Abstract: A cap for disinfecting a needleless connector is described here-
in. The cap includes a housing having a cavity and an insert disposed within.
The insert includes one or more cantilevered prongs disposed on a distal wall
of the insert. The one or more cantilevered prongs are configured to bend upon
insertion of the needleless connector. On an outer sidewall of the one or more
cantilevered prongs are one or more ledges extending at essentially a right
angle to the one or more cantilevered prongs, the one or more ledges being
configured to push against the sidewall of the housing to resist further bending
of the one or more cantilevered prongs upon advancement of the needleless
connector.
