

ALPHA-AMINO ESTERS OF HYDROXYPROPYLTHIAZOLIDINE CARBOXAMIDE DERIVATIVE AND SALT FORM, CRYSTAL POLYMORPH THEREOF

Abstract of the Invention

5 The invention provides pharmaceutical compositions comprising a compound of formula (I) or (II) and an additional therapeutic agent. Also provided is the HCl salt and crystalline form of the compound of formula (I). The compounds inhibit the prostaglandin F receptor (PGF2alpha) and thus useful in the treatment of disorders such as preterm labor at the early gestational stage.
