(54) Title: SHOW EFFECT SYSTEM FOR ATTRACTION SYSTEM

FIG. 1

(57) Abstract: A show effect system of an amusement park attraction includes a prop component and a linkage system having an extension and a contactor system. The linkage system is configured to move relative to the prop component to move the extension toward the prop component and to cause engagement between the contactor system and the prop component, cause the prop component to move, via the engagement between the contactor system and the prop component, in conjunction with the extension, and block direct contact between the prop component and the extension. The extension is coupled to an animated figure such that the linkage system is configured to cause movement of the animated figure via the extension.
