(54) **Title**: UNIVERSAL PATIENT RECORD CONVERSION TOOL

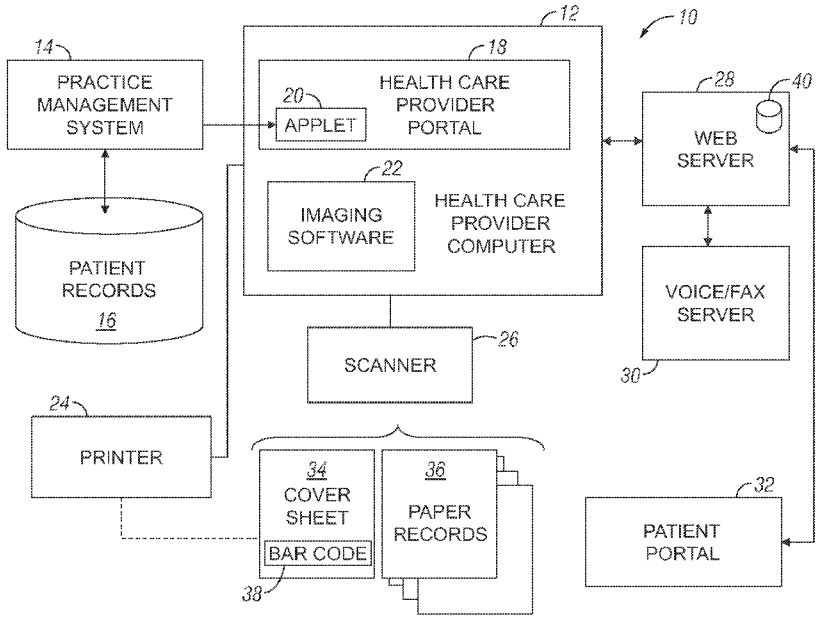

FIG. 1

(57) **Abstract**: A system includes a health care provider computer operatively connected over a network to a web server, the web server providing a health care provider portal and an applet. The applet is configured to convert patient records in a first format to patient records in a second format. The first format may be associated with a practice management system, may be an electronic health record format, may be a personal health record format, or other type of format.
