ABSTRACT

DRUM TYPE WASHING MACHINE

5           A drum type washing machine includes rotary drum 3  
having an approximately horizontal or slanted rotational  
axis; outer tub 2 for accommodating rotary drum 3 therein;  
driving motor 5 for rotating rotary drum 3; detergent case 9  
for accommodating detergent 9a therein; a first water supply  
10 unit for supplying water into outer tub 2 via the detergent  
case 9; and a second water supply unit for supplying water  
into rotary drum 3 through front opening 16 thereof; and a  
controller 20 for controlling driving motor 5 and the first  
and the second water supply unit to execute a washing  
15 process during which water is supplied first up to a first  
water level, and rotary drum 3 is rotated at a first  
rotational speed for a time period, and water is supplied up  
to a second water level, the first water level being lower  
than the second water level.
