(54) Title: METHOD AND SYSTEM FOR PROVIDING VIRTUAL SERVICES

(57) Abstract: A technique is provided for providing virtual services. The technique includes generating a virtual environment comprising a plurality of user interface (UI) objects that corresponds to a plurality of services provided by a service provider. The technique further includes rendering the generated plurality of UI objects on an electronic device of a user in a manner to provide a user experience (UX) to the user that emulates a physical experience of the user with the services provider. The technique further includes processing a request received from the user corresponding to a selection of a UI object from the rendered plurality of UI objects. The technique further includes providing a service to the user that corresponds to the selected UI object.
