

METHOD FOR REDUCING α -AMINOKETONE

ABSTRACT

A method for reducing α -aminoketone derivatives stereoselectively under mild conditions is provided.

A method for reducing α -aminoketone which comprises reacting an α -aminoketone derivative of general formula (1) with a compound prepared from an organoaluminum compound of general formula (4), a sulfonic acid derivative of general formula (5), and an alcohol compound of general formula (6) to give an α -aminoalcohol derivative of general formula (7).
