(54) Title: SMOKING ARTICLE WITH DUAL FUNCTION CAP

Figure 1

(57) Abstract: A smoking article (10, 100) is formed from two component parts. These parts are a rod (20, 120) comprising an aerosol-forming substrate (55, 155) and a removable cap (30, 130). The removable cap (30, 130) can be coupled to the rod (20, 120) in two configurations. In a first configuration, the removable cap (30, 130) is coupled to a first end (21, 121) of the rod (20, 120) and a heat source (50, 150) located at or near a second end of the rod (20, 120) heats the aerosol-forming substrate (55, 155) to generate an inhalable aerosol. In a second configuration, the removable cap is coupled to the second end (22, 122) of the rod (20, 120) and at least substantially covers the heat source (50, 150). The smoking article (10, 100) is arranged in the second configuration for disposal.
