

ABSTRACT
CEILING FAN

A first protrusion protruding from an upper lighting cover is fitted into
5 a first installing portion provided in a cover and a second protrusion protruding
from the upper lighting cover is inserted into a first hole provided in the cover.
In a case where disassembly is performed from this state, disassembly can be
accomplished by breaking a first breaking portion provided around the first
installing portion. In a case where reassembly is performed from this state,
10 the second protrusion protruding from the upper lighting cover is fitted into a
second installing portion provided in the cover.
