

ABSTRACT

The present invention relates to a detachable harbor edge protector, and a detachable harbor edge protector according to an embodiment of the present invention includes a bottom plate of which a cross section is formed in a curved shape and which
5 is fixed to a stepped ground surface, one or more fixing parts which fix the bottom plate to the ground surface, an upper cover detachably coupled to an upper portion of the bottom plate, and a side cover coupled to a side surface of the bottom plate. Accordingly, since the bottom plate and the upper cover are detachably formed, maintenance can be easily performed when damage occurs.
