4) Title: METHOD AND APPARATUS FOR SEPARATING LIQUID FROM A MULTI-PHASE LIQUID/GAS STREAM

(57) Abstract: A tubular separation unit (20) insertable into a caisson or tube for separating liquid from an upward flowing liquid/gas multi-phase stream, and comprising: a centrifugal flow-induced liquid separator (21) having a multi-phase gas/liquid inlet (23), a liquid outlet (25), and a gas stream outlet which flows into tubing (5), a liquid transfer conduit (24) connected to the liquid outlet (25) of the flow separator, and a pump (26) for pumping liquid, disposed below the separator (21) connected to the liquid transfer conduit (24), and through which liquid separated in the separator is received, and a pumped liquid outlet (28) through which the separated liquid is caused to flow.
