(54) **Title:** SIGNALING OF GENERAL CONSTRAIN INFORMATION

600

Performing a conversion between a video comprising one or more pictures and a bitstream of the video according to a rule that specifies that a syntax structure in a profile-tier-level syntax structure is after a syntax element, the syntax structure comprising information related to general constraint information (GCI) for the bitstream, and the syntax element indicating a level to which an output layer set associated with the profile-tier-level syntax structure conforms

610

FIG. 6

(57) **Abstract:** Methods, systems and devices for signaling of general constraint information are described. An example method of video processing includes performing a conversion between a video comprising one or more pictures and a bitstream of the video according to a rule, wherein the rule specifies that a syntax structure in a profile-tier-level syntax structure is after a syntax element, wherein the syntax structure comprises information related to general constraint information (GCI) for the bitstream, and wherein the syntax element indicates a level to which an output layer set associated with the profile-tier-level syntax structure conforms.
