

CLEANING COMPOSITIONS INCLUDING FERMENTED FRUIT SOLUTIONS

Abstract

Described herein are cleaning compositions comprising fermented fruit solutions and builders, methods for making the same, and methods for using the same. The fermented fruit solutions can contain fruit, sugar and water. The builder can be selected from the group consisting of a non-phosphate builder, such as sodium citrate and sodium bicarbonate, boric acid and mixtures thereof. The cleaning compositions can be used to clean articles, launder articles, clean stains from articles, and clean surfaces.
