

ABSTRACT

PRESS-SLIDE KNEADER, METHOD FOR COATING WITH IONIC- CONDUCTIVE POLYMER, AND POWDERY MATERIAL

A press-sliding mixer, wherein a mixture of the ion-conducting polymer or ion-conducting polymer raw material 121 and the powdered substance 11 is processed so that the powdered substance 11 is coated by the ion-conducting polymer 12, a coating method and a powdered substance are further proposed to provide a device and a coating method wherein a powdered substance is efficiently coated by the ion-conducting polymer, and a coated powdered substance.
