Claims

1. Use of a wax in the manufacture of an unsaturated fatty acid absorption accelerator for the treatment of cardiovascular disease, blood fluidity or allergies, to prevent cognitive impairment, to regulate immune function, or to enhance learning ability and/or memory.

2. The Use according to Claim 1, wherein the wax is a beeswax.

3. The Use according to Claim 1 or 2, wherein the unsaturated fatty acid is one or more selected from the group consisting of n-3 polyunsaturated fatty acids and n-6 polyunsaturated fatty acids.

4. The Use according to any one of Claims 1 to 3, wherein the unsaturated fatty acid is at least one selected from the group consisting of eicosapentaenoic acid and docosahexaenoic acid.

5. The Use according to any one of Claims 1 to 4, wherein the unsaturated fatty acid absorption accelerator is in a capsule form comprising a capsule film and a composition encapsulated inside the capsule film, wherein the composition comprises the wax and the unsaturated fatty acid.

6. The Use according to any one of Claims 1 to 4, wherein the unsaturated fatty acid absorption accelerator is in a capsule form comprising a capsule film and a composition encapsulated inside the capsule film, wherein the capsule film comprises the wax and wherein the composition comprises the unsaturated fatty acid.
