

ADHESIVE COMPOSITION

ABSTRACT

An object of the present invention is to provide an adhesive composition having excellent adhesive properties and adhesiveness to a variety of plastics such as polypropylene, polyethylene, or a cycloolefin resin. The adhesive composition of the present invention comprises a polymer having a repeating unit derived from a polymerizable compound of the following formula (I):

(wherein X^1 and X^2 each independently represent a C7 to C20 alkyl group or a C7 to C20 alkoxy group; n represents 0 or 1; Z^1 and Z^2 each independently represent a single bond or a C1 to C3 alkylene group; R each independently represents an organic group or a halogeno group; m_1 and m_2 each independently represent any integer of 0 to 4; and Y represents a polymerizable functional group).
